<thead>
<tr>
<th>7. TASKS/PROCEDURES</th>
<th>8. HAZARDS</th>
<th>9. ABATEMENT ACTIONS</th>
</tr>
</thead>
</table>
| Catching Stock      | Being Stepped On or Kicked | - Do not excite stock, movements are deliberate but smooth, don't be loud.  
|                     | Injury to Person/Stock- | - Sort into smaller groups and pens |
| All stock users will have obtained required stock training prior to any use | | |
| Saddling, Brushing, Grooming | Injury to Person/Stock | - Do not feed until you've caught and tied up all the desired animals  
| | | - Insure stock is tied securely and halters fit properly  
| | | - Never have loops in the halter ropes. |
| Packing and Lifting Equipment Techniques (16.43) (52.42) | Injury to Person/Stock | - Stand in safety zone by withers  
| | | - Do not make sudden noise or movement  
| | | - Make sure saddle fits properly and is in good repair  
| | | - Know the animal by name and brand number  
| | | - Check for injuries  
| | | - Do not brush over wounds  
| | | - Check all tack and blankets for dirt and debris/ remove any burrs or other foreign materials from pads.  
| | | Untie horse before tightening cinch.  
| | | - Use proper ropes for pig tails on saddles, Pig tails on saddles are designed to break when you have mishaps with pack stock. Using the wrong rope for pig tails on pack saddles, ropes that do not break, could cause a hazard.  
| | | - Use proper lifting techniques  
| | | - Before loading packs stretch and loosen muscles to reduce the chance of muscle strains or other injuries |
- Ask for help when lifting heavy packs, lift with your legs and knees, not your back, keep body straight and do not twist while lifting
- Have rope and pack ready prior to attempt
- Stay calm and reassuring with stock
- Keep sharp edges covered
- Make sure saddles and packs are secure
- Keep the animal's back clean
- Use breakaways to tie the pack string together/have extras
- Use lead rope approximately 10 feet in length
- Keep saddle pad straight, saddle blanket smooth, saddle properly fitted and tight, and side packs as equal in weight as possible
- Hikers should yield to stock traffic. When encountering hikers who are unfamiliar with stock, ask them to stand on the downhill side of the trail and to wait for the stock to pass completely past them before they return onto the trail. If stock spooks, standing downhill will encourage them to go uphill and lessen the chance of an accident. Stock users will be prepared to either move aside safely or turn around, if required, to find a safe passing zone.

- Make sure there are no unsafe gaps between bumper and loading ramp
- Be alert when loading
- Do not wrap the lead rope around your hand or any part of your body, tie short and not too high
- Do not allow animal to pin you within trailer when loading stock
- Safe driving practices
- Conduct a pre-trip safety inspection of trailer/truck
- Make sure the stock truck brakes are working properly, test the brakes prior to approaching the loading ramps at Spotted Bear Ranger Station, the fuel tanks at Spotted Bear Ranger Station are in a hazardous location in front of the loading ramps, make sure your brakes are working, so you do not run into the fuel tanks
- Avoid quick starts and stops when driving
- Avoid excessive speeds on curves and turns, shift down, less braking.
- Unload livestock before jacking up a vehicle to change a tire, if possible
- Alternate the facing of each animal when hauling more than three animals
- Secure divider ropes between each animal

<th>Riding Practices (16.41)</th>
<th>Lightning</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Never ride livestock into the truck</td>
<td></td>
</tr>
<tr>
<td>- Never ride an animal when a lightning storm is nearby or in progress</td>
<td></td>
</tr>
<tr>
<td>- When working around stock, always speak to an animal when approaching from any direction</td>
<td></td>
</tr>
<tr>
<td>- Always lead an animal around after being saddled and before being mounted or packed</td>
<td></td>
</tr>
<tr>
<td>- Do not tie the lead rope around the lead horse's saddle horn or wrap the rope around your hand</td>
<td></td>
</tr>
<tr>
<td>- Do not run the animal</td>
<td></td>
</tr>
<tr>
<td>- Do not secure extra tools or equipment on livestock being ridden or carry them in your hands while riding. Ax or oregon saw with scabbard may be attached to saddle. Use of saddle or pommel bags for personal gear is o.k.</td>
<td></td>
</tr>
</tbody>

<table>
<thead>
<tr>
<th>Feeding Livestock (16.45)</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Do not feed or water a sweaty animal until it has cooled off</td>
</tr>
<tr>
<td>- When feeding or salting animals, exercise caution as even gentle animals may become aggressive and dangerous</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Riding alone</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Insure that your route and estimated time of arrival is known</td>
</tr>
<tr>
<td>- Have a 2-way radio (make sure it works) and extra batteries (that are good) before you leave</td>
</tr>
<tr>
<td>- Check in with the district or any other FS personnel when possible if running late or you will change your itinerary</td>
</tr>
<tr>
<td>- Use extra caution</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Personal Protective Equipment (16.3)</th>
<th>Improper boots</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Standard PPE includes: (1) first aid kit (2) riding boots, field boots, or work shoes that will not hang up in stirrups. Shoes should cover ankle and have a heel. Only experienced riders may wear spurs. (3) Protective head gear designed for</td>
<td></td>
</tr>
<tr>
<td>Riding Livestock (16.4)</td>
<td>livestock riding is recommended for inexperienced riders and should be available to employees on request</td>
</tr>
<tr>
<td>------------------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td>- Bean boots or insulated Pack boots (rubber bottoms and leather uppers) may be worn in very wet weather, muddy, or cold weather conditions</td>
</tr>
<tr>
<td></td>
<td>- The packer or individual assigned for pack/saddle livestock handling shall match livestock with employee(s) according to riding skills</td>
</tr>
<tr>
<td></td>
<td>- Instruct employees that all livestock can be dangerous</td>
</tr>
<tr>
<td></td>
<td>- Before riding, hold tailgate safety sessions addressing livestock habits and characteristics</td>
</tr>
</tbody>

<table>
<thead>
<tr>
<th>Securing Livestock (16.42)</th>
<th>Entanglement</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Don't use bridle reins to tie livestock</td>
</tr>
<tr>
<td></td>
<td>- When tying livestock, clear away debris and tie the lead rope at least 4 feet (2 m) above the ground to prevent entanglement</td>
</tr>
<tr>
<td></td>
<td>- Don't tie livestock to trees with sharp branches, injury to livestock could result</td>
</tr>
<tr>
<td></td>
<td>- Tie the animal to an object using a rolling slipknot. Where possible, tie the rope to an object that the animal cannot walk completely around</td>
</tr>
<tr>
<td></td>
<td>- After tying livestock, don't cross under the lead rope</td>
</tr>
<tr>
<td></td>
<td>- Don't tie the animal to a wire fence or rail. Tie to posts.</td>
</tr>
<tr>
<td></td>
<td>- Don't position yourself in front of tied livestock</td>
</tr>
<tr>
<td></td>
<td>- Leave halter on under the bridle. Don't bridle or unbridle horse while it is tied up.</td>
</tr>
<tr>
<td></td>
<td>- Use cotton rope at least ½-inch diameter for picketing</td>
</tr>
<tr>
<td></td>
<td>- Unless picketing or hobbling livestock, do not tie to movable objects. Hobbles should not be placed below the ankle.</td>
</tr>
<tr>
<td></td>
<td>- When near the rear of livestock, stay close, maintain contact, and talk to the animal</td>
</tr>

</tbody>
</table>
Abatement measures listed below are in the order of the preferred abatement method:

a. Engineering Controls (the most desirable method of abatement). For example, ergonomically designed tools, equipment, and furniture.

b. Substitution. For example, switching to high flash point, non-toxic solvents.

c. Administrative Controls. For example, limiting exposure by reducing the work schedule; establishing appropriate procedures and practices.

d. PPE (least desirable method of abatement). For example, using hearing protection when working with or close to portable machines (chain saws, rock drills portable water pumps)

e. A combination of the above.

Block 10: The JHA must be reviewed and approved by a line officer. Attach a copy of the JHA as justification for purchase orders when procuring PPE.

Blocks 11 and 12: Self-explanatory.
