

Risk Assessment Analysis					Project Risk Assessment				Project:		Stock Use		
Identification of Hazards and Risk Assessment					Mitigation(s), Warnings and Reminders				Mission Objectives:				
Subsystem	PRE-MITIGATION				POST-MITIGATION								
	Hazards (Loss of)	Likelihood	Severity	Risk Level	Likelihood	Severity	Risk Level	Additional Local Mitigation	Acceptable Yes/No				
Emergency Preparedness	Lost, missing, or overdue employee	Remote	Catastrophic	SERIOUS	Improbable	Catastrophic	MEDIUM						
	Emergency response to illness or injury	Remote	Catastrophic	SERIOUS	Improbable	Catastrophic	MEDIUM						
Trainings and Certifications	Kicks, bites, strike, stepped on, run over, bucked, rear, spooks. Results of poor Horsemanship and training.	Occasional	Negligible	LOW	Improbable	Negligible	LOW						
	Kicks, bites, strike, stepped on, run over.	Occasional	Negligible	LOW	Improbable	Negligible	LOW						
General	Kicks, bites, strike, stepped on, run over.	Occasional	Negligible	LOW	Improbable	Negligible	LOW						
	Kicks, bites, strike, stepped on, run over.	Occasional	Negligible	LOW	Improbable	Negligible	LOW						

	Kicks, bites, strike, stepped on, run over.	Occasional	Negligible	LOW	Transport: (Stock Truck) Load and Unload from a safe and solid structure. Be sure there are no gaps between the structure and the truck. Properly secure the gate before moving the vehicle. (Trailer) Load and unload from stable, level ground. Support the door, secure the door before moving the trailer.	Remote	Negligible	LOW	
	Bucks, Rears, spooks, falls	Occasional	Marginal	MEDIUM	Riding involves technique in the following "Mounting". When getting on, foot placement in the stirrup being just in enough to support the weight and controlling the reins at the same time till mounted. The animal should stay still until you ask it to move. "Dismounting" Just the opposite of mounting, control the reins, slide your foot part way out of the stirrup having just enough to support your self all the way to the ground. The animal should remain still the whole time. "Reining" The reins are to maneuver the animal in a direction. Side to side, backing and stopping. The use of our legs also maneuver the animals, forward (slow and fast), combined with the rein a sideways step can be achieved. The reins are to be held on the animals neck with out any tension when the animal completes the task you asked it to do.	Occasional	Marginal	MEDIUM
